

To Have Visitors' Day at the Local School Tomorrow

Public Is Invited to Attend The Afternoon Session

AS announced in last week's issue of the Review, ALBERTA SCHOOLS WEEK will be brought to a close here on the observance of "visitors' day" tomorrow afternoon when all interested persons are cordially invited to go to the local schools to see how the classes are conducted. A special invitation is extended to all parents of school children and members of the school board. Classes will be conducted as usual in all the public school rooms from 1:30 p. m. until recess, so that visitors may have the opportunity of observing which ever class they are most interested in. It is hoped that those attending will be on time so that the classes will not be disturbed once the teachers commence the lessons.

Commencing at 1:30 p. m. a debate will be held in the high school room, the subject for the discussion being: "Resolved that the evils of modern machine production outweigh the advantages." The affirmative will be upheld by Margaret Rutherford and Helen Rose and their opponents will be Jim Brown and Albert Podesta.

After 15 minutes' intermission for recess a spelling match for the public school championship will be held in the high school room. This will take place at 3 p. m. sharp. Elimination contests have been held throughout the week and the final finds a picked team of four from grade seven pitted against four grade eight representatives. Under the point system in use, grades five and six are tied for first place. It will be necessary for grade seven to spell down at least three of the grade eight team in order to be declared the best spellers for this grade. Grade seven finalists are Geo. Ballantyne, Alfred Schaeffer, The grade eight representatives are John Brydie, Effie Stratton, Lily Knudsen and Flora Bruckner.

Following the spelling match final there will be a current event match, the high school girls competing against four high school boys. If the weather is fine the boys will give a demonstration of physical training outside, if not, there will be an indoor passball game between the ten fastest high school girls and the ten fastest public school boys.

Edmonton Chamber of Commerce has decided to petition the provincial government for a grant to establish, in that city a plant for the manufacture of paper from straw.

Vega Rebekah Lodge will hold a bridge and whist drive followed by a dance on St. Valentine's evening Feb. 14 in I. O. O. F. hall. Good prices, good music. Admission 25c each.

Federal Tariff Board Has Been Announced

Progressives Are Represented On The New Board

Mr. Justice George H. Sedgwick, of the Supreme Court of Ontario, Charles Hebert, of Montreal and Milton Cammell, Progressive member of the House of Commons for Mackenzie, Saskatchewan, have been named to constitute the new tariff board. Official announcement of the appointment was made in the House of Commons by Mr. Hon. Sir George Perley in the absence of Premier Bennett.

Hints At Reduction Of School Grant

Reduction of provincial school grants, which cost the province about \$1,500,000 a year, was hinted at by Hon. Percin Baker, minister of Education, when speaking to the Alberta School Teachers' Association annual convention. There is a certain type of school district, said the minister, where the grant was higher in proportion to the needs than in other districts. At this juncture he also drew attention to the financial operations of the province, in which expenditures had to be based on revenue.

Mrs. Gibbons of Sutherland is the guest of Mrs. J. Rutherford this week.

Mrs. Scanlan underwent an operation in Medicine Hat hospital last Thursday, and is doing as well as can be expected.

Mr. Adam Dubois returned last Saturday from Saskatchewan where he has been selling oranges during the past couple of weeks.

Quite a number from town attended the dance at Lake Valley school last Friday evening and report an enjoyable evening.

Entry forms for the horse sale to be held in Medicine Hat on March 10th and 11th are now available and may be obtained from W. Huckvale at the Chamber of Commerce bld.

Mr. John Caline met with a nasty accident last Monday, while engaged at his work in the mine. One of the cars struck him, throwing him to the ground and bruising his arm.

Mrs. Schaeffer entertained several ladies to a pleasant afternoon on Monday last in honor of Mrs. Penrose and Mrs. Jackson who have been visiting their father Mr. Watson, and are expecting to return to their respective homes this week.

Last Thursday evening after choir practice, the senior choir of Gordon Memorial spent the evening in a social gathering in the school room of the church. Games of various kinds were played and the lady members of the choir served delicious refreshments, including ice cream.

NO MUNICIPAL ELECTION IN TOWN THIS YEAR

All Councillors and School Trustees Elected by Acclamation—Only a Few Ratepayers Turn Out

As only the required number of candidates for both the town council and school board were nominated last Monday, returning officer F. Baird, declared all elected by acclamation.

As usual there was very little interest manifested by the ratepayers and it was only at the last minute that these slate was completed.

The following were nominated for the council and all were declared elected:

E. C. Newnam, nominated by H. Johnson and J. Kitchen. R. C. Hargrave, nominated by F. Broughton and A. N. Collard. F. E. Broughton, nominated by G. H. Worts and A. Sanderson. P. Lavelle, nominated by G. H. Worts and R. C. Hargrave.

For School Trustees: H. Johnson, nominated by J. Kitchen and E. C. Newnam. H. G. Sheasby, nominated by C. T. Hall and H. M. Sangster. Mrs. Kitchen nominated by S. C. Newnam and H. M. Sangster.

TRADERS WHO ARE DUMB

We came across the following clipping the other day.

A merchant has forwarded us the following extract from the last week's issue of "The Grocer." The moral for all tradesmen grocers and everybody else, who neglect to advertise and are, in a business sense, dumb, is obvious. This rhymed advice was suggested by the paucity of advertising by retail grocers in the author's own district in the south-east of England:

O tradesman, in thine hour of ease,
If on this paper thou shouldst see,
Take my advice, and now be wry.

Go straight ahead and advertise! Thou'lt find the project of Some one, Neglect can offer no excuse, Be wise; therefore prolong thy day;

A silent business man dikk. That man is dead who never tells About the products that he sells His bacon, butter, eggs and cheese, His pickles, pepper, plums and ppp.

His coconas, coffees, tongues and titt. Those grocers surely must be jaa. Who can't see advertising paid For who looks down as does not the strrrr

He only fills the "ohlt" prrr. Miss Dorothy Kitchen was taken to the hospital last Tuesday afternoon suffering from an attack of appendicitis. She was operated on Wednesday and is now progressing favorably.

HETOR LANG

M. L. A. for this constituency, who left this week for Edmonton to attend the session of the legislature which opens today.

Spring Meeting of The Hat Presbytery

The regular spring meeting of the Medicine Hat Presbytery was held in Memorial Church, Medicine Hat, last Tuesday. Rev. S. Pike, of Blairmore, acted as chairman and Rev. R. E. Fow as secretary. The local lay representatives, Mr. Henderson, was unable to attend owing to the cold weather.

Presbytery nominated Rev. R. Magowan, of Calgary, as president of next conference. Statistical reports revealed increases in religious educational organizations, while the general life and work compared favorably with last year.

Churches

ST. AMBROSE & HURCH
Rev. Malcolm Stewart, Vicar
9 a. m. Holy Communion.
10 a. m. Sunday school.
1st and 3rd Sundays
11 a. m. Choral service.
2nd, 4th and 5th Sundays
11 a. m. Mattins and 8 p. m.
7:30 p. m. Evensong and sermon.

GORDON MEMORIAL UNITED CHURCH
Pastor: Rev. R. E. Eakine
Sunday, Feb. 12th
10 a. m. Church School.
11:15 a. m. Morning Worship
Subject: "The Eminence of the Cross."
7:30 p. m. Evening Worship.
Subject: "Attitude of Christ; Christ's Waiting."
To sense one's own failure and the Divine aid, is to become a Christian.

ST. MARY'S CHURCH
Celebration of Mass every Sunday of each month except first Sunday at 8:00 a. m.

It is now around to subscription again. How is yours?

New Auto Insurance Bill Is Drafted

Repeal of the automobile sections of the Alberta Insurance Act and enactments in their place of a uniform automobile insurance act, will be one of the most important pieces of legislation to come before the 1933 session of the house, it was learned on Monday. The main feature will be to give protection to the innocent third party of an auto accident.

Present policies have too many loopholes which allow the companies to escape responsibility for the innocent parties in an accident.

Vega Rebekah Lodge Elects New Officers

On the first meeting night in January the Local Rebekah lodge here held installation. The following officers were installed by Sister Mary Kellett: V. D. P. and her staff of Past Noble Grand, for the year 1933 Irene Palnau J. P. N. G. C. Ulmbeck N. G. D. Kitchen V. G. M. Hill Rec. Sec.; A. Mcaschlan Fin. Sec.; A. Hill Treas. L. Leppard Warden; E. Jones; V. Hill O. G.; E. Fairbairn I. G. N. Leamouth R. S. N. G.; E. Moore L. S. N. G.; M. Moore R. S. V. G.; A. Mallard L. S. V. G.; B. Fairhurst Chap. E. Cann Organist.

M. Ambrose W. A. Had Pleasant Social

The bridge, whist afternoon held in the parish hall on Feb. 1st, under the auspices of St. Ambrose W. A. was a real success. The prizes for bridge went to Mrs. H. Camp and Mrs. Hicks, while those for whist were won by Mrs. Tanner and Miss Pinder. The president Mrs. Cox, was absent owing to illness. Mrs. Congram, vice president, acted as hostess, assisted by Mrs. W. Champ, Mrs. Vogstad and Mrs. Fairhurst. A very pleasant afternoon was enjoyed by all present.

NEW PLAN FOR THE WAR DEBT SETTLEMENT

Since the meeting of Sir Ronald Lindsay, British Ambassador to the United States, with the British Cabinet, it is rumored that a plan is now under way whereby the United States will make a new offer of settlement for war debts. The suggestion is that a lump sum of between \$1,250,000,000 and two billion be paid to the United States in full settlement.

JUST FOR FUN

The following is the third in the series of Limericks which the Review hopes the boys and girls are putting in their scrap books.

FRANKNESS

As a beauty I am not a star,
There are others more handsome by far,
But my face-I don't mind it
For I am behind it.
It's the people in front get the jar.

Carnival at the Rink Last Friday A Great Success

Was Well Attended And Lots of Fun Was Provided

There were a few men seen around town last Saturday who looked ten years older than usual, as a result of the hockey game played the night before at the skating rink carnival, and those who saw the game were not a bit surprised. A goodly crowd of spectators got quite a kick out of seeing the graceful manner in which the Hasbeens and the Nevilles swept up the ice for the races which followed.

Those who attended the event expecting a good night's fun were not disappointed.

Although the number in costume for the carnival was not as large as was expected, those who were dressed for the occasion made an interesting variety to the several other attractions. So interesting and amusing was the program from start to finish that the committee is now being encouraged to put on another in the near future.

The several events were keenly contested and kept the crowd entertained during the evening. A most amusing feature was the Spanish bull fight which kept the younger ones guessing as to how foreboding Oakland's bull so well trained. He passed the bull several times without getting hooked.

The following is a list of the prize winners:

Potato Race—E. Congram.
Boys' Race—E. Schmidt.
Ladies' Backward Race—Jean Pow.
Men's Race—E. Podesta.
Relay Race—E. Podesta and L. R. Stone.
Best Costume—Nora Jacobson.

In the drawing for the three free prizes offered, the following held the lucky numbers:

M. Baker won the ham; A. Birmingham, the flour and Miss Bainbridge the \$1.00 worth of bread.

The committee cleared a tidy sum and they wish us to extend their hearty thanks to all who contributed in any way to the success of the evening.

The hockey teams lined up as follows:

Capt. Worts' team—T. Balmer, J. Horne, A. Ellis, I. Trembath, A. Lyons, H. Sangster.
Capt. Mathany's team—Jim Daere, Ed L. Stone, W. Cammureau, J. Devitt, R. Simpson, and G. Thomson.

Three periods were played. Shorty's team winning out by 3 goals to 0.

Sambo Floyd refereed the game to the entire satisfaction of all.

ALBERTA'S WHEAT BONUS

Alberta's share of the wheat bonus paid last year by the federal government was \$5,867,785.42, according to figures just released by the board of grain commissioners. This amount was paid on 117,184,708 bushels.

TIME FOR SHOWDOWN

Ratepayers in town were more or less stunned by the contents of the letter received from the Utilities Commission, and which was read at a special meeting of the council, called for the purpose of considering the contents of the letter, last Tuesday week.

In the first place the general impression is that it is all very fine for the Commission to say what the council should do, but what it must do, what it can do, and what it can't do, but it is quite another thing to carry out all these instructions.

For instance, when the Commission writes: "The town must now bring its affairs into such shape that it will be possible to finance on current revenue which can be collected," what does it really mean?

What, the ratepayers—and, no doubt, the councilors too—would like to know is: what is where is this current revenue that can be collected?

Despite the fact that the mill rate was raised five mills last year, the taxes collected were some eight thousand dollars less than the previous year. This the Commission should know, since it is supplied regularly with the auditors' report. Yet the commission suggests in its letter that "in all probability a sharp increase in the tax levy will be necessary this year." When a large percentage of the taxpayers cannot pay their taxes with the rate as at present or at the even lower rates the year before, it is hard to figure out how it is expected they will be able to pay at an even higher rate now. To expect to raise additional revenue by placing a heavier burden on those who can and do pay, is simply riding a willing horse to death and will eventually kill the goose that lays the golden egg.

It is estimated that at present the industries in town are paying seventy-five per cent. of the taxes of the town. Their taxes now run from two to five hundred dollars a month under the present mill rate. Any line of business can stand only so much overhead expense and when the overhead becomes more than the business can stand there is only one thing to do. This not only applies to industries but to all lines of business activities. For this reason it looks as though all lines have reached their limit so far as taxes are concerned. Then why talk of raising the tax rate?

Another suggestion made by the Commission is that "the council make an appeal to the ratepayers for the pre-payment of their taxes." Where will this end and what will it lead to? If things continue as they are at present the Commission is liable to suggest next year that the paying ones be asked to pay two years in advance and so on ad infinitum.

The general impression appears to be that the bond hold-

ers have considerably the best of the argument in the present arrangement. It has been said that when the rebonding scheme was consummated, that the bond holders were making some sacrifices. There are many now who cannot see it that way, since it is figured out that by the time the present contract with the bond holders is completed they will have been paid back in the vicinity of \$700,000 for the original \$314,000 odd which the town borrowed from them. Nor in this all. Besides their regular interest the bond holders—who are largely in the United States—are receiving approximately \$1000 a year additional through the difference in exchange. This is something for which they never moved a finger to create; but was manipulated for them by those who hold the purse strings. Then again, the bond holders are able to live from 25 to 50 per cent. cheaper today than they were when these debts were contracted. On the other hand taxes have increased by about the same ratio to meet their indebtedness.

On the whole it looks as though it is about time the Commission should give some thought to the taxman.

It would appear that the time has about arrived for a showdown.

It now appears that those organizations and papers which criticized and condemned the federal government for its action in connection with the Russian oil and cattle battle were a bit hasty.

According to recent exposures the government would have been very unwise had they done other than exactly what they did do.

There is still a few who have not yet renewed their subscription to the Review.

Redcliff Reminiscences

Taken From Our File of
Feb. 13—1914

Redcliff Hockey team beat Medicine Hat in a League Hockey game on Friday last where the score being 3-0. At half time the Hat team left for home having filed a protest against three Redcliff players. The betting was heavy—five hundred bucks finding a restful place in Redcliff. The lineup for Redcliff was Forbes, Orr, Brown, Murphy, Ouellette, Fairbairn and Harvey.

Mr. Young informed the Review yesterday that three car loads of machinery for the steel factory had arrived. He expects to have the plant in running order and turning out a high grade of boots and shoes in three week's time.

The ladies of the Civic Improvement Society held their first annual ball last Friday. They netted close on \$200 which will be used to help make the city more beautiful.

The contract for the building of the Knitting Factory, which will be Redcliff's tenth manufacturing plant, is to be let soon. The factory will employ 40 men and will be opening by the end of July.

Debus Bros. now own the skating rink outright and will endeavor to give their patrons a place of amusement second to none.

Mr. and Mrs. J. W. Learmonth arrived from England recently.

Mr. E. L. Aultman has arrived from Cincinnati to look after the business affairs of Mr. W. T. Lockwood.

Born at Redcliff, to Mr. and Mrs. Jensen, son.

Here and There

"The decrease in freight car loadings which began in 1912 has continued almost uninterrupted. In 1921 up to the end of the first week of December, 662,332 were freight cars had been loaded on all Canadian Railways than for the same period of the previous year. During the same period of this year 174,615 cars were loaded than in 1921. The decline in passenger business has been relatively the same. The resultant effect upon railway earnings has been naturally disastrous. For the first ten months of 1931 Canadian Pacific gross revenue declined 22.1 per cent. as compared with that of 1930. For the first ten months of this year the decline was a further decline of 14.4 per cent. The decline continues, and there certainly appears to be no light at the end of the tunnel for many years we shall see the railway companies' earnings back where they were in 1925."—E. W. Beatty, K.C., Chairman and President, Canadian Pacific Railway, in his review of 1932.

In the vanguard of the winter vacation traffic to the South West Coast, the Orient, the Canadian Pacific liner "Empress of Canada" cleared the Narrows of Vancouver January 31 with a list of 41 passengers.

Recent payment by Great Britain of \$24,500,000 for debt adjustment, reminds old-timers of the war days when \$16,000,000 was shipped by Canadian Pacific Express from Asia to England via Canada, and was carried over the Dominion on a special Canadian Pacific train, having absolute right-of-way. The train travelled with lights and was protected by scores of armed guards.

"Dark and uncertain as the outlook may appear to the casual observer, I still think that in this wilder field the year has not been without important developments leading towards stage stabilisation and permanent improvement."—E. W. Beatty, K.C., Chairman and President, Canadian Pacific Railway, in his review of 1932.

"Through intelligent education the economic and social facilities of the Canadian people shall be raised to the level of Mr. Norman Angell, British economist and diplomat of his generation. He sided recently by Canadian Pacific liner from the British Settlements in the United States.

Of the \$446,612 pounds of canned goods consigned in Canada between April 1 and November 30, 1932, all but 113,282 lbs. came from countries within the Empire, nearly half the total for the year. The British Settlements.

Millinery in Canada is near the vanishing point. According to the last census in 1921, 92.14 per cent. of the population of Canada, over five years of age could either read or write. Students enrolled in Canadian schools in 1931 number 1,542,147.

Editorial Comment Supports Beatty Consolidation Plan

Editorial opinion throughout Canada has been very largely in favor of the consolidation plan advanced by E. W. Beatty, K.C., Chairman and President, Canadian Pacific Railway, looking toward the consolidation of the two railway systems under one management, as the only practical means of relieving the intolerable burden upon the Canadian taxpayer.

Beatty made his proposal in a recent speech before the Toronto Canadian Club, and the following paragraphs from leading editorial on the subject, clearly indicate the nation-wide scope of supporting public opinion.

"This is far and away the most useful, constructive, and stirring contribution to the discussion of our transportation problem that has yet been made."—Montreal Gazette.

"Dramatic action appears to be needed if the transportation problem is to be lifted from the shoulders of its people."—Montreal Herald.

"It is essential with our small population that the railway companies and services should not outrun the needs of the country."—Montreal Chronicle.

"There is much that appeals to the suggestion of Mr. E. W. Beatty, K.C."—Hamilton Herald.

"We agree with the President of the Canadian Pacific Railway that the country must get down to business."—Montreal Herald.

"Mr. Beatty has uttered a definition of the railway problem, definite steps to this end should not be delayed."—Vancouver Star.

"The most constructive of all suggestions have emanated from Mr. Beatty."—Vancouver Sun.

"He urges the drastic remedies he deems necessary, regardless of every consideration, except the salvation of the two great railway systems and of the State."—Vancouver News.

"Mr. Beatty's carefully considered pronouncement compels serious thought as to whether the unexplored period of a monopoly are great enough to require that the Canadian people shall be so paying millions annually for the doubtful privilege of having separate systems."—Woodstock Standard.

"It would be a notable success if the recommendations of Mr. Beatty were to be adopted by Parliament."—Sherrinboro Daily Record.

"Mr. Beatty's view is obviously in accordance with the general movement as it is coming throughout the world."—Ottawa Citizen.

"What the country needs is a consolidated industry of a tough kind as we are doing. The one fact stands out, that the Beatty consolidation report was based on public opinion. Mr. Beatty's argument rests on the plain business requirements of the situation."—Montreal Star.

"Mr. Beatty has courageously made clear the issues between balanced public ownership, and full private ownership and management, operating under the control of Parliament."—Montreal Star.

"With no solution suggested, Mr. Beatty's address should be read and digested. It throws in its consolidation there must either be a publicly owned system or a privately owned system. That is the issue. The Beatty Consolidation did not settle it."—Lethbridge Herald.

"The more one studies the old figures in the case and considers the present standing of the disastrous financial condition in the operation of the C.P.R. the more inevitable becomes the conclusion that public ownership has proven disastrous."—Brandon Telegram.

"There appears to be no common sense but a manager of the two great systems."—Saskatoon Telegram.

"Mr. Beatty has shown great courage in his proposals."—The Financial Post.

"This merger seems to be the best chance of getting out of the situation into which we have fallen."—The Financial Post.

"As put by the President of the Canadian Pacific Railway, the situation before Canada seems to be to either have one railway system or to have two separate systems, or by one or the other."—Toronto Telegram.

"It is significant that Mr. Beatty is interested primarily in business about amalgamation, especially in the form of a consolidation."—Calgary Alberta.

"When the two systems are lumped into private or public ownership, and the two systems are put in work for Canada."—Vancouver Sun.

"C. P. R. President of the C. P. R. is the consolidation of our two great railway systems and the Labor Leader is in a position to agree with him."—Lester Leamon, Toronto.

"The suggestion is consistent with Mr. Beatty's program. The Vancouver Freeman, Vancouver Star, Vancouver Herald, Vancouver News, Vancouver Telegram, Vancouver Sun, and the Vancouver Citizen.

Grain Through Canadian Ports

Said That There Is Considerable Saving In Using All-Canadian Routes

The growing tendency to ship Canadian grain through Canadian ports is emphasized in a review issued by the Dominion Bureau of Statistics. During the month of December Canada exported 27,726,000 bushels of wheat of which 21,201,177 went to the United Kingdom and of these exports to the United Kingdom, the amount via United States ports was only 1,212,210 bushels, the balance going via Canadian ocean ports. The shipments to all other countries went entirely by Canadian ports.

This is a marked change from a year ago when 6,005,038 bushels went to Great Britain in December through U.S. ports and 5,872,909 bushels through Canadian ports. The bureau of statistics of course draws no conclusions as to the cause of this remarkable shift.

Representatives of United States grain exporters are protesting at Washington that the change is due to the Imperial preference on wheat and the uncertainty under what conditions wheat shipped from Canada through U.S. to Britain would get this six cents a bushel advantage.

Ottawa officials are inclined to agree that the uncertainty as to the preference is one cause for the change. Canadian exporters know they will get the preference when entering the U.K. markets if the grain is shipped through Canadian ocean ports, and are very uncertain of such an advantage if it is to be routed through the ports of the United States.

However the contention is that it is not only more sure to ship through Canadian ports (and it keeps the money in Canada), but that it is cheaper. Freight rates are competitive as are also elevator charges, and accordingly it is stated it costs as much in U.S. money to ship to United States ports as it does to ship the money to ship to Canadian ports. With the Canadian money at a 12 per cent discount in New York, it is said that the saving is considerable when Canadian ports are used.

The fact that all the grain shipped in December from Canada to overseas countries other than Britain, and therefore not affected by the preference, went through Canadian ports indicates that the preference was not entirely responsible for the swing.

The heavy shipments of Canadian wheat to Great Britain are competitive with the crop year which began on August 1st is shown in the reports. December's totals to the U.K. were 27 per cent more than in 1921-22, 1921-22. During the five months ending December the amount to Great Britain was 56,446,495 bushels, a 67 per cent increase over the same period a year ago.

Island On the Move

Greenland Moving Westward About Sixty Feet Every Year
Greenland has moved 60 feet westward since 1920. The theory of the late Professor Geertz that the continents are moving is confirmed by Dr. Knud Rasmussen, the famous Scandinavian explorer who has been working recently with the Greenland Geodetic Expedition.

Having taken astronomical observations in relation to the meridian of Greenwich he has established the fact that Greenland is moving westward at an average of 60 feet a year, while Denmark in comparison is moving only three feet every hundred years.

Apples For the Prairies

Studies Carried Out At Experimental Station At Morden, Manitoba
One of the principle studies being carried out at the Dominion Experimental Station, Morden, Manitoba, is the testing of varieties of apples suited for production in the prairie provinces. A recent report shows that among apple varieties giving substantial crops were: Anis, Anis Rose, Anisovka, Blushed California, Crushe, Dornbus, Harrow, Kinsale, Anis, Melba, Melvin, Patten, Pink, Red Wing, and Wealthy. In crops, Apple, Bedford, Columbia, Crab, Ontario, Worcester, Gertie, Olga, Osmun, Reindeer, and Trail were planted.

In the apple seedling test, 154 trees bore fruit for the first time. Of these a gave fruit of good promise. During the three years preceding, 1,761 seedling apple trees gave fruit which were described. A total of 650 or 740 per cent of these were considered as new varieties of value.

Friend—Whatever because of that shiny and ugly little thing you used to run around with?

BEAUTIFUL MONTREAL CHURCH DESTROYED—HALF A MILLION DOLLARS' DAMAGE

A mass of twisted, mouldering debris surrounded by four scarred walls is all that remains of the beautiful Church of St. Louis de France, one of the finest Roman Catholic Churches in Montreal. Our picture shows a view of the interior of the church, which was gutted in a spectacular fire which caused damage of more than \$400,000, and for a time threatened to engulf a large section of Montreal in a general outbreak. Flying embers lit fire to 73 homes and the roofs of thirty automobiles before firemen controlled the conflagration. The arson squad are investigating possible incendiaries.

Old Dobbin Comes Back

Horse Helping To Keep Down The Overhead During Times Of Depression

A paragraph of special interest to Canadian farmers appearing in the annual report of the Horse Division of the Live Stock Branch is quoted as follows:

"In certain sections there is a demand for higher class-legged horses, big enough to do some work on the farm and also suitable for a certain amount of road work. The demand for hunters and saddlers compared with some previous years is by no means keen, nevertheless, the outstanding animal still finds a market at a good price. The interest in the hunter and saddle horse, however, is apparently as keen as ever judging by the fact that hunt and riding clubs are increasing either by decreasing or under present conditions. This goes to show that as conditions improve the demand for this type of horse will steadily increase. As it takes at least five years to develop a hunter and as there is a scarcity of them in the country today, the horseman that continues to breed will be the fortunate one four or five years hence. The same holds true in the breeding of draught horses. The demand for horses for draught work is growing and will undoubtedly continue for some time owing to economic conditions. It is further safe to assume that to many it has been demonstrated that the horse is helping to keep down the overhead under economic pressure and he will also help to lessen operating costs in better times."

In crops, Apple, Bedford, Columbia, Crab, Ontario, Worcester, Gertie, Olga, Osmun, Reindeer, and Trail were planted.

In the apple seedling test, 154 trees bore fruit for the first time. Of these a gave fruit of good promise. During the three years preceding, 1,761 seedling apple trees gave fruit which were described. A total of 650 or 740 per cent of these were considered as new varieties of value.

New Canadian Money

Royal Canadian Mint At Ottawa Issues Currency To Value Of \$600,000 In 1923

In the calendar year 1923, the Royal Canadian Mint at Ottawa issued 24,228,390 coins having a currency value of \$600,000. The value of the silver coins were: 50-cent pieces, \$134,400; 25-cent pieces, \$134,400; 10-cent pieces, \$134,400. Five-cent silver pieces to the value of \$136,000, and one-cent pieces to the value of \$132,300 were issued.

Of the gold bullion received by the Mint during the year, 2,585,930 ounces of gold were purchased and 634,547 refined. It contained 2,529,529 ounces of fine gold, and 326,677 ounces of fine silver. A total of 2,854,077 ounces of fine gold was delivered during the year to the currency branch of the Canadian Government Department of Finance and 27,644 ounces to manufacturers and others. This had a total value of \$29,294,754. This gold came from the mines of Canada and provided the largest gold transaction since the war years, when the Mint refined much of the gold produced by the mines of South Africa.

Moor Liquor Used

The settlement of Palestine by immigrants from the U.S. and Europe has brought a large increase in the use of liquor. Before the war there were 25 licensed places in Jerusalem, now there are 400, and in all Palestine nearly 1,000. Three breweries have been established, and there has been a doubling of liquor importation into the country.

No Time For Gardens

Men Were Slaves To Steam Engines Hundred Years Ago

Following is an article by William Howitt in "Rural Life in England," 1837, reprinted in G. K.'s Weekly, London.

When steam-engines abound, and are at the foundation of all the labors of a place, as in Manchester, for instance, there you will find few gardens in the possession of the mechanic. The steam-engine is a never-resting, unwearyable, unspeakable giant and despot, and will go on humming and setting thousands of wheels and spindles in motion; and men must stand, as it were, the slaves of its undying energies. O! what was the fate of the ancient gent to the fate of our modern mechanic! What was the role of the "slaves of the lamp," or the slaves of tailors' manes, to that of the slaves of the steam-engine! They could vanish and he at rest till came the irresistible call; they could sport over ocean and desert, through the air and the clouds; they could speed into the depths of space and wander amid the inconceivable mysteries and miracles of unknown worlds, till the omnipotent spell recalled them to execute some temporary wish of their tyrant, and then return to a wide liberty. But the slave of the steam-engine must be at the beck of his tyrant night or day, with only such intervals as barely suffice to restore his wearied strength and faculties—therefore you shall not see garden fountains and summer-houses rise in the vicinity of this hurrying and tremendous power.

It is in fact, or but partially predominant, there may be the mechanic to enjoy the rural pleasures of a garden. And how many are those pleasures?

As with most exercises the element of competition enters into the full enjoyment of skating. The swift and exciting hockey games are one of its byways. The colorful carnivals where one may see the gay masquerade, the other day, the London engineer responsible for a famous telephone area was notified that one of the instruments under his control was "out of order."

To the house he sent a young and ambitious engineer, with orders to show the machine to the repair shop. With great speed, the repair was made. Then the young man, remembering that he ought to get an order for a new telephone facility, if he could.

He opened his bag, and from it produced a "hand-microphone" instrument.

"Sir," he said, "this is the sort of instrument you want." The other sort is out of date.

The master of the house listened. He smiled.

"But I am quite content with the instrument I have," he said.

"Of course, sir, you've every reason to be. Our post office—though I say which there is a postage rate—has been in the world, still—there's the difference."

The master of the house began to leave. The engineer would think about it, he said.

"Nothing like the present, sir!" urged the engineer.

"I'll have one," he murmured, and handed the engineer his card.

Outside, the engineer looked at the card.

It read:

"Sir Kingsley Wood."

"His Majesty's Postmaster-General."

The post office has charge of the British telephone system.

Summer Is All Daylight

And Winter In Greenland Is One Continuous Night

Summer in Greenland only lasts one day—but it's a pretty long day. There are four months on end of continuous daylight.

But this has to be paid for in winter, when the midnight sun gives way to the midday night. For there are four months of darkness—tempered by the moon and the aurora borealis—across which with any anywhere. It is for four months out of the twelve that the Greenlanders have alternate day and night like ours.

Germany's Deficit

Finance Minister Von Krosigk, reviewing Germany's financial status before the Reichstag Ways and Means Committee, estimated the 1922 budget deficit at 2,070,000,000 marks less than the estimated 7,666,000,000 marks budget.

Danmark is thought to be the oldest city in the world.

The Pleasure Of Skating

Frozen Surfaces Provide Great Sport For Young Canadians

The average Canadian father, keeping the welfare of his family in view, cannot escape expenditure on fuel, food and clothing, nor can he afford an average Canadian family can he avoid a certain expenditure on winter sport equipment. Rarely has he ceased buying baby shoes than he is called on to provide skates and boots, for young Canada early realizes and capitalizes the advantages of the health giving winter months. In rural sections the ponds and streams which were the scenes of summer adventure change to spots of winter pleasure. A frosty night or two covers the surface with a glassy sheet, and eager test courting of strength, unfortunately not always warranted, the youngsters soon glide over the element in which they splash on sunny days. Short is the season of skating on the natural lawns for snow usually comes early to put a stop to it, though these occasionally ensure for ice skating the season of skating out-of-doors.

No less eager are the youngsters in town and cities where many a made rink, open and covered, provide an artificial ice-field of more protected use. The moonlight, and torches which illuminate the ice sheets in the country here give way to electricity, and from down to far into the night the light of the city shines on the skaters.

Young, middle-aged and here and there an older glide by on the blades of steel. Happy faces, and the gleam of the skates, the enjoyment of the passing hours that is the heritage of the skaters, for skating is a social and health exercise.

As with most exercises the element of competition enters into the full enjoyment of skating. The swift and exciting hockey games are one of its byways. The colorful carnivals where one may see the gay masquerade, the other day, the London engineer responsible for a famous telephone area was notified that one of the instruments under his control was "out of order."

CHILDRENS COLDS

WORLD HAPPENINGS BRIEFLY TOLD

Amey Johnson has been awarded the gold medal of honor of the League of Youth, for her recent Capetown flight.

Twenty sailors from H.M.C.A. Steens, stationed on the Pacific Coast, arrived in Halifax recently on their way to England, where they will take a course in gunnery.

The Canadian Authors' Association is going to tour the United Kingdom during the coming summer. The party will sail from Quebec on July 3.

Dates of the fifth Pacific States congress which is to be held in Vancouver and Victoria, have been fixed. It will be from June 1 to June 15.

Freedom for the Philippines was granted by the United States Congress, the senate voting to override President Herbert Hoover's veto of the independence bill.

Canada moved into fifth place among the exporting nations of the world in 1932 according to a preliminary survey of world trade, carried out by the Dominion Bureau of Statistics.

Establishment of a memorial to Canadian and American soldiers of the war, in the form of an international forest of 10,000,000 acres, is being considered by conservationists of the two countries.

Inspector Gilbert Smith, Ottawa, and Inspector R. R. Jackson, of the Dominion penitentiaries branch, are being retired on reorganization of the branch. It was learned in official circles.

The agreement arrived at during the Imperial Economic Conference between the United Kingdom and Canada which will modify the restrictions on the importation of Canadian cattle came into operation on January 27.

A case of leprosy, the second within a year, has been discovered in Toronto. The man is in isolation hospital and will probably be taken to the leprosy colony in New Brunswick. He is a former resident of Rio de Janeiro, where it is believed he contracted the dead malady.

Bright Colours Coolest

Color Has Much To Do With Keeping Refrigerator Cars Cool

The current issue of the Cold Storage News Letter, issued by the Dominion Dairy and Cold Storage Branch, contains reference to the results of tests which have been made to determine the relative value of bright and dark colours in keeping refrigerator cars cool. These studies show that the colour with which a car was painted had much to do with the degree of penetration of solar heat into the car. There was less penetration of solar heat through light-colored paints than through darker ones. Under the conditions of radiation and exposure to sunshine, car surfaces painted red were better than those painted black. It was found. It was found also that the difference between air and surface temperatures for stationary cars was about twice as great as for moving cars.

Does Not Happen Often

Remarkable Record Concerning Ex-President of United States

Only four times in the history of the United States have there been periods in which there were no living ex-Presidents.

The first was between the death of Washington in December, 1799, and the inauguration of Thomas Jefferson in 1801.

The second occurred during General Grant's term as President, when the death of Andrew Johnson in July, 1875, left the nation without a living ex-President until Grant was succeeded in 1877 by President Hayes.

The third period in which there was no living ex-President occurred in June, 1908, when Grover Cleveland died.

The death of Calvin Coolidge creates the condition for the fourth time.

Recipe For Long Life

"Stay Single" Says Oldest Woman in South America

To live long, don't marry. This is the advice of Donna Rosa Hunscho Tobar, the oldest woman in South America, who has reached the age of 129. At her home in Santiago, Chile, she said, as she smiled through her wrinkles: "I should never have lived so long if I had had a husband." Her birth is inscribed in the register of the old Spanish Colonial Church, the site takes in watching, when she began as a girl, when the Chilianas were fighting the Spaniards for independence.

By Ruth Rogers

The story is told of Alexander the Great, that when he was leaving Macedonia, he made so many lavish presents to his friends that one of them asked him, "But what are you leaving yourself?" The reply was, "My hopes."

So full was the mind of the mighty conqueror of the countries and nations yet to be brought under his sway and the treasures yet to be gathered into his stores, that all the riches already won were as nothing in comparison.

Men's greatest assets are their hopes. This is true especially now, when we stand at the beginning of life and look eagerly forward to the good things which the coming years may bring. But it is well to remember that the realization of our hopes for the future depends on our making the best use of the opportunities of the present. Hopes are assets of the utmost value, but they will become "frozen assets" unless we do our part to give them life.

Revenue From Hay Lands

During the last fiscal year which ended April 30, 1932, there were 477 hay permits granted on the public domain in Saskatchewan under which 4,851 tons of hay were cut, and 320 permits granted on school lands which produced 3,073 tons or 7,924 tons in all. The revenue from the sale of hay permits on provincial crown lands during the year was \$1,887, and on school lands, \$1,007 or a total of \$2,894.

Wife: "Will you love me if I get fat?" Husband: "No. I promised for better or worse—not thick or thin."

IT HAS THREE POINTS — AND THEY'RE BLENDING GRACEFUL ONES

One of them is the deep inset vest with brief braced effect that narrows the bodice breadth. The padded skirt is smart and the flared hem is full, with a slight dip at the waist, give the skirt graceful length.

Crissie crepe satin can be used to smart advantage, using the reverse surface for contrast. Her woollens and velvet are also suitable.

Style No. 963 is designed for sizes 16, 18, 20 years, 22, 24, 26, 28 and 30 inches bust.

Size requires 3 1/2 yards 36-inch with 1/2 yard 36-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

FAMOUS AVIATORS IN NEW ENVIRONMENT

Practically every photograph taken of Amy Johnson Mollison and her no less famous husband, Captain Mollison, in recent months has shown the daring fliers landing after breaking a record, or starting off on a long-distance flight. Here's one that is a little different. Amy and her husband are pictured in St. Moritz, Switzerland, starting out on a ski to try a new kind of speed which is almost as exhilarating as flying.

Realization Of Hopes

Depends On Making Best Use Of Present Opportunities

The story is told of Alexander the Great, that when he was leaving Macedonia, he made so many lavish presents to his friends that one of them asked him, "But what are you leaving yourself?" The reply was, "My hopes."

May Waive Imposition

Government To Consider Dump Duty Exchange Dump Duty

Provided that Canadian importers can arrange with British manufacturers to have the price of British goods increased by the desired amount, the Canadian government will waive the imposition of the exchange dump duty.

This statement of policy is implicit in a letter sent by the department of national revenue to a Canadian importer. A letter, confirmed by the national revenue department, reveals the change.

The vital paragraph in the letter reads:

"The requirements of the order-in-council (meaning the sterling exchange order passed shortly after Britain abandoned the gold standard) are complied with when the importer remits to the exporter in payment for the imported goods an amount equal to \$4.40 for each pound sterling of the fair market value."

Even this ruling is believed to be purely of a temporary nature, while the matter of the dump duty is to be considered anew in the next few weeks and an amendment clearing existing confusion will be introduced when parliament reassembles. Precisely what policy will be decided upon cannot yet be forecast.

Queen Mary Popular

Close To Hearts Of British People Says Prince Of Wales

The Prince of Wales is quoted as saying that his mother, Queen Mary, is closer to the hearts and minds of the English people than any member of the royal family. A notable proof, the queen has a faculty of doing things that attract favorable attention. There is the case of Arthur Tappin, for instance. He is one of the active workers at St. Stephen's Mission. Tooting. He is 37, and when the queen visited the mission, Arthur conceived the idea of writing to Queen Mary and asking if she would contribute a few gifts for the mission.

TO SEE HER FAT GO

Cost This Woman 75c.

If you are curious to know what it is like to be fat, read this letter:— "I was 145 lbs. when I started taking Kruschen three months ago, and my weight still more. I hope to reduce my weight to 110 lbs. in three months. I am 40 years old, 5 ft. 6 in. tall, and 40 lbs. in weight. I am a housewife, and my age being 40 years. A 75c. bottle of Kruschen costs me a month. I take one half-teaspoonful in a tumbler of hot water each morning before breakfast. Apart from losing weight, I feel so much better. In fact, I do not wake up in the morning still feeling tired, and do not get headaches like I used to. I cannot thank Kruschen enough."—(Mrs.) M. A. H.

Kruschen contains those six mineral salts, proportionately balanced, found in the water of those famous European spas used by generations of fat people to reduce weight. Kruschen also contains the liver, glands, and body organs to function properly—you gain extra strength and energy—feel years younger—look better, work better.

No Merger With Canada

Premier Of Newfoundland Says Confederation Not A Live Issue

Possibility of confederation with Canada is not a live issue in the mind of the premier of Newfoundland, F. C. Alderley has stated definitely that the subject was not even discussed during the Imperial Conference at Ottawa, held by the governments of the United Kingdom and Canada which led up to the two governments sending the island Dominion \$2,000,000 loan to help her meet bond interest.

Nor has the disposal of Labrador been considered. Despite the premier's vigorous denials, however, and the general incredulity with which the populace regards current reports, the Newfoundland peninsula-confederation and Labrador—have been getting some attention lately from the government of Canada.

Apparently the announcement on December 29, that pursuant to the British and Canadian laws, a royal commission would conduct "into the future of Newfoundland," had the effect of starting the confederation subject again. The premier replied with an emphatic "no" when he was asked if any such interpretation could be placed upon the statement.

The premier's denial of confederation would be opposed strongly in many quarters should the question become a serious issue. Newfoundland industrial concerns would be against removal of protective duties they now enjoy and the throwing of the market to other manufacturers. Then, too, Newfoundland depends for her governmental revenue on levies on imports. And there is a widespread feeling that confederation would be opposed strongly in many quarters should the question become a serious issue.

Then, too, Newfoundland depends for her governmental revenue on levies on imports. And there is a widespread feeling that confederation would be opposed strongly in many quarters should the question become a serious issue.

+ Do You Know? +

World On Even Keel

More than 50,000 persons paid admission to five hockey matches over a recent week-end; 10,000 in Toronto, 12,500 in Detroit, 9,700 in Chicago, 9,000 in Montreal.

Reports of English football games played at the same time mention crowds of 35,000, of 20,000 and so on.

At the same time millions of people everywhere were paying to see pictures, fights, a thousand forms of sport and recreation, just as though they had never heard of a depression.

Or, on the other hand, perhaps they go to escape hearing other people tell how hard up they are, to avoid explanations of technocracy and war, to debate any rate they go places and do things and spend money, and it all helps keep the world on an even keel.—Ottawa Journal.

Thoughts On A Pocket

A pig born near Midway, Ontario, is said to have a full measure of its hind legs ought to be and nothing at all where the tail ought to be. How similar to a lot of the foot of us, not pigs, who have a pocket where the money ought to be and nothing but a hole in the pocket where the money would be if we had looked after the pocket which is now not a pocket but a hole.

After Leaving London

Mr Henry Lytton, who has appeared in Gilbert and Sullivan operas for nearly 30 years, made his last bow to London audiences at the close of the season at the Savoy, January 21. However, he is not thinking of retiring although he is 66, for he has booked a provincial tour which will extend well into 1934.

Shakespeare never made a continuous journey so far as a trip from Regina to Winnipeg.

SYNOPSIS
CHAPTER I—Larry Young, one of Alan's men, discovered in Macmillan's den a safe of pills stolen from the "Midnight Sun". The evidence incriminated Dave as strongly as if Alan had compelled to hear Joyce, the hotly defended her father. Alan leads his expedition up the Big Alouka.

CHAPTER IV—Continued.
Halfway there, disaster over-whelmed them, and they were forced to turn back. It came from the air, in the shape of a pair of red-throated loons. Flapping heavily out of the west, the birds dropped with a loud splash not ten feet away from the two men. At the splash Alan heard a muffled oath over in the flag; then a rustling movement, as though the bandits had nervously jumped for their guns; then silence. And then a voice from the twilight among the reeds:

"Noblar, Ju!" a pair of divers plumped down.
"The alarm would have blown over if the loons had swum off. But the birds, crop-heavy and indolent, stayed where they were, showing no intention of moving away. As the female started preening herself, the male eyed her suspiciously at the two strange objects sticking above the water."

"What started it Alan never knew. Bill did not know he himself did not but an eyelash. But in that jump the male suddenly threw open his head, and with a vigorous manual attack, as though some animal had seized it by the neck."

"Instantly the male joined in. 'The diving, acrobatic, danced, and the muskrat diving off their houses and flushed every waterfowl in the lake a hundred yards distant. A last frantic peal the loons taxied over the water, finally managed to take wing, and flapped heavily away."

But the damage had been done beyond retrieve. All that hour and a half of careful stalking, all the great caution, and pains of slight uneasiness upon the bandits, had been set at naught by the crazy shriek of a crazy loon."

Over in the murky twilight of the flags there was a commotion, sharp orders, the click of rifle bolts. At the edge of the flags a gun came back, and a dozen flags reached out, a bullet ricocheted off the water."

"It was a shrewd maneuver from the bandits, a tentative shot to draw the fire of their stalkers and discover where they were. Alan was quick-witted enough to see their motive and to lie low; but Bill jerked his rifle against his cheek and shot point-blank at the sport of fire."

A cry of pain went up. His bullet and scored. But the shot gave away their hiding. With all hope gone now

When Your Daughter Comes to Womanhood
Give Her Lydia E. Pinkham's Vegetable Compound

Most girls in their teens and a tonic and regulator. Give your daughter Lydia E. Pinkham's Vegetable Compound for the next few months. Teach her how to guard her health at this critical time. When she is happy, healthy, wife and mother she will thank you.

W. M. W. 1278

of getting the drop. Alan scrambled behind cover of a muskrat house, fully dragging Bill after him.

Half a dozen rifles exploded in the flags. Alan thrust his rifle over the top of the house and upspotted it at the bandits. A bullet from a savage's sharp-cracking double Savage, hit his weapon, smashed the mechanism, numbed his hand, and drove jagged fiery bits of steel into his fingers.

For several minutes the bullets of the bandits beat a thudding tattoo against the mud mound. At last they could Alan and Bill lifted their bul-guns over the top of their shelter, and fired back. They heard no more yelps of pain. They were shooting wildly, aimlessly. Realizing this, believing the bandits had crept into the run and were sheltered by its banks, Alan stopped shooting and called Bill.

Yonder in the reeds the first died away raggedly. A silence fell. A minute lengthened into two, three, four. Alan heard, or thought he heard, a faint rustling, a faint gurgling of water. He listened intently, but did not hear it again.

With his eyes all shattered, with the twilight steadily deepening, he was torn with desperation. If he and Bill moved, it was sheer suicide. If they crouched much longer behind the flags, they were shooting wildly, aimlessly. Realizing this, believing the bandits had crept into the run and were sheltered by its banks, Alan stopped shooting and called Bill.

As he thought to think of a plan that would break this deadlock, he heard a low whistle, a clear shrill whistle from Larry's direction. It was Larry signaling.

He sprang up. "Bill! They're back of us, they're slipped, they're breaking for the lake! Larry's alone. We've got to help Larry!" They splashed out of the pond and into the lake. In a frantic effort to reach the lake edge. The marsh reeds clutched at them, tripped them, wrapped around their legs. Heavily they tore their way through to get into the clear time to help Larry stop their bandits.

Swimming his chubby rifle, making a pathway in front of him, Alan heard a low gun crack over his head, and heard the snarl of a half dozen repeating weapons answering it with an echo. They drowned, they overbalanced it. . . . The lone gun did not speak again.

It seemed hours to him that he fought and roared through the dense flags to reach the open and help a comrade who was standing up against six rifles. Before he broke through the flags, the uneven battle had ended. As he burst out to the lake edge, he had a glimpse of the police canoe drifting hurriedly out in the middle, and across at the far side he saw two long blurred objects just behind the deep-water channel.

Numbed, and dazed at these six men crouching, there was a moment when Alan could only realize that his patrol had failed. That those criminal-looking men vanished into the twilight and were lost in this watery wilderness, with pursuit utterly hopeless now.

With the next moment he heard a sound, a sound like a growling voice calling his name. It drew his eyes to the drifting gun craft. What was that? What was that? He had heard it underfoot. What he understood what Larry had done. When the bandits started across in the police canoe he must have seen them. He could never stop them in the semi-darkness except at point-blank range. In the police canoe he must have seen them. He could never stop them in the semi-darkness except at point-blank range. In the police canoe he must have seen them. He could never stop them in the semi-darkness except at point-blank range.

His first deadly volley had got him. That growling voice was Larry's. Bill came bursting through to the clear. Alan whirled on him:

"Bill! They got Larry. He's wounded. Hand him. Help . . ."

Tossing Bill his belt-gun and broken rifle, he ran out into breast-deep water and struck out powerfully for the drifting gun craft.

By a provident mare he reached it in time. With half a dozen holes in the water, the drift was still falling, gliding, about to overturn. Larry lay at the bottom of it, writhing in pain.

By jerky struggles, swimming, pushing a deadweight ahead of him, Alan cut the craft into shoal water, pulled him under its keel then, and kept it afloat.

He dragged it to the bank just as Bill came splashing around the lake's edge to side him.

"Alan! What happened? Where's they got?"

"They got away. They're gone—gone. Forget it. Help me, Bill—with Larry."

Together they bent over their bleeding, stricken comrade and together they lifted him tenderly ashore.

CHAPTER V.
The Broken Sword

By the light of an electric torch Alan cut away Larry's clothing and examined his wounds. Larry had

Has Exciting Job

Life Of Quack Doctor Detective Phil Of Thrills

The wealthiest man in Detroit today has had angina pectoris in six languages, yellow fever in at least eight—including the Scandinavian and spots before the eye in practically every flesh.

He is Otto Fischel, who speaks seven languages, and it is to be paid to be killing. Never a day passes that he doesn't have something. His last "cure" required 61 different medicines to treat—only he didn't take any.

The man of many malaises is a quack doctor. He is the City Board of Health, and it is his job to uncover medical quacks and charlatans who practice in Detroit. He was selected because he is in perfect health, and because he looks a little like a man about to be stricken with practically everything.

Fischel's job isn't a pleasant one, and often it has proven dangerous. Always he is in disguise, and always he has a symptom, sometimes many symptoms. He buys a sample of the medicines prescribed, testifies to the efficacy of "treatments" offered, and starts on another case.

Recently he visited the office of a foreign-speaking "doctor," disguising himself as a factory laborer. In his best Bohemian, he listed an array of symptoms, and gave a foreign name to each.

"The doctor" asked him to lie on an examining table. Then, deliberately, he drew from his surgical case a long thin knife. He leaned over his patient.

"Do you happen to know a fellow by the name of 'Otto Fischel'?" he asked, quietly moving the knife closer to Fischel's chest.

"No," said Fischel, his heart turning to lead.

"The doctor" abruptly walked across the room and stood for several minutes beside a window. Suddenly he wheeled about.

"Hey, Fischel," he called.

The trembling patient made no move. Finally the man strode to his side.

"You know what?" he said, grinning. "I thought for a moment you were Otto Fischel, the detective. And you know what? I have had answered my call! I would have carved out your heart."

Fischel completed his case and left in a hurry.

Lesson Has Been Costly

Canadian Borrowers Should Protect Themselves Against Exchange Vagaries

Canadian borrowers may, of course, learn some lessons from the present rate experience. Some of these were referred to in The Financial Post somewhat over a year ago when it was urged that Canadian cities, provinces and corporations should never again make their securities payable in anything but the lawful money of Canada; that they should, if necessary, pay a slightly higher borrowing rate in order to protect themselves against vagaries and absurdities. If Canadian cities and governments and our larger corporations adhered firmly to such a policy and were supported by Canadian banks and investment bankers, foreign buyers of our securities would be more apt to buy them.

Canada has benefited from the investment of foreign capital but a great deal of this capital has been obtained at much too high an ultimate cost. We would have been better off without it—Financial Post.

Soured On The WORLD—THAT'S LIVER

Wake up your Liver Bill

No Calomel necessary! Many people, who are not properly treated, make the mistake of taking Calomel. This is a very dangerous habit, and it is not only bad for the liver, but it is also bad for the stomach.

Many people, who are not properly treated, make the mistake of taking Calomel. This is a very dangerous habit, and it is not only bad for the liver, but it is also bad for the stomach.

Many people, who are not properly treated, make the mistake of taking Calomel. This is a very dangerous habit, and it is not only bad for the liver, but it is also bad for the stomach.

Many people, who are not properly treated, make the mistake of taking Calomel. This is a very dangerous habit, and it is not only bad for the liver, but it is also bad for the stomach.

Many people, who are not properly treated, make the mistake of taking Calomel. This is a very dangerous habit, and it is not only bad for the liver, but it is also bad for the stomach.

Jimmy Montgomery dead, Larry in the shadow of death, that tragedy hovering over innocent Joyce MacMillan, the bandits escaped and the patrol disgraced—in all this evil-entangled affair only one thought held their comfort for Alan. It was vengeance thought, born of a savage and vengeful mood. He held a sword and Inspector Haskell. Haskell had ordered this patrol to be split. Out of his ignorance and jealous anger, he had issued that crazy order, and it had wrecked the patrol. His gross, incompetence, which heretofore had been only a vague charge hard to prove, now stood out glaringly, in all its inescapable guilt.

(To Be Continued.)
